Objective

Seeking to build meaningful, creative solutions every day alongside people who challenge and inspire. Explore emerging technologies and design trends. Eager to leverage interpersonal skills to foster collaboration between clients and team members. Thrive in environments that value continuous curiosity.

Projects

Walsh Web Works — *Personal Design Business*

Showcasing some of my work, initiative, and ideas.

See walshwebworks.com for more details.

Experience

WINDELL inc, 210 E Main Street — *Senior Developer*

August 2016 - Present

Break down client needs into programmable solutions that look great, function well, and meet modern programming standards. Write clean, easily legible code to support collaboration with other developers. Create and maintain WordPress themes, build applications from the ground up, develop custom APIs, integrate third-party services, and manage database interactions using PHP.

Work to improve SEO, generate reports in Google Analytics, and collaborate on projects using GitHub and Asana. Maintain efficiency while managing a small web department of two to three people.

Education

Scottsdale Community College

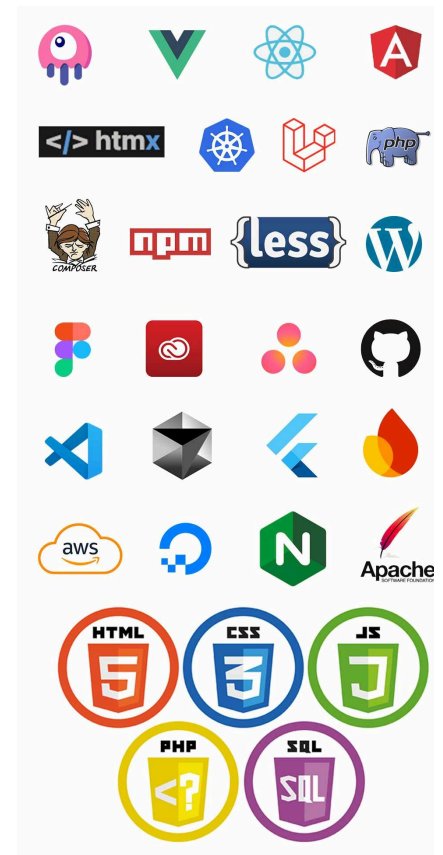

2015 | Web Development

Paradise Valley Community College

2013 | General Education

+ Learning More Each Day
